Ponoka Fire Brigade Re-organized

Officers Elected and Practise Arranged Weekly

Ponoka's Fire Brigade has been re-organized, and a good deal of enthusiasm is being manifested by the young men of our town. Practise takes place every Friday evening, and it is expected that every man possible will be at his post so as to become conversant with his duties.

The new fire engine is working splendidly, as also the whole equipment; indeed, Ponoka never had such adequate fire protection, and that being the case a well-drilled brigade is in order. And this brings up the question of how much is the average citizen doing to encourage the boys in their work? Everything depends on a well drilled brigade, and the property owners should feel a sense of security in having such a fine lot of young men taking an interest in the town's affairs.

Following is the list of the members:—

Fire chief, W. W. Russell; assistant chief, K Kirkwood.

Fire engineers—H. J. Rees, M. V. Stephens, M. G. Neff, O. Longman, J. D. Grauo, G. D. Clark

Reel No. 1.—A. C. McGillivary, capt.; J. McDonald, R. Thomson, J. J. Few, E. Wilkinson, H. Halverson.

Reel No. 2.—Hugo Schmidt, capt; E. Cannon, R. Slater, J. Stevenson, V. Brown, J. Purnell.

Chemical No. 1.—P. McKelvey, capt.; Chris. Schmidt, C. Snider, B. Stephens and B. Wright

Chemical No. 2.—J. Farrell, capt.; W. DeWilde, A. McDonald, Don. Hambley.

VERTICAL LIFTING AEROPLANE INVENTED

London, May 31.—Leading British aviation experts believe the secret of vertical ascent and descent and hovering in flight by heavier than air craft has been definitely discovered by Louis Brennan, whose torpedo was adopted by the British government. Such discovery, it is admitted, would revolutionize flying, making possible the rise or descent of aeroplanes from roofs of buildings or ships. Brennan has been engaged for some time on experiments with a helicopter. Perfection of the helicopter vertical lift machine has been the cherished aim of aircraft inventors for the last dozen years. The details of Brennan's invention are being closely guarded, his hangar, where experiments are conducted, being guarded day and night.

MARRIAGE FEE DOUBLED

It costs more to get married now. An amendment to the marriage ordinance, passed by the last legislature and now being put into effect, raises the price of a license from $3, at which it has stood for a long time, to $6, and notice has been given to all the 700 marriage license issuers in the province to charge that rate in the future.

The increase has been made for a double purpose; to raise more revenue for the province and to serve as a check on the number of too-youthful marriages. It is believed that it will have a tendency in this direction without discouraging the orthodox and legitimate marriages.

Another amendment to the ordinance, also operative this month, is to the effect that persons over eighteen, but under twenty-one years, who formerly have had to have the consent of a parent before being given license to marry, may now have such license issued to them if they are living apart from their parents, earning their own living, and not receiving any parental support.

Persons between eighteen and twenty-one years, whose parents refuse consent, may now apply to a judge of the supreme or district courts, who may, at his discretion, grant an order that a license be issued. This is provided by a third amendment to the marriage ordinance.

Floods In England

Louth, England, May 31.—Twenty bodies of those who lost their lives Saturday night in the sudden overflow of the river Lud, have been recovered and many persons are missing. Unofficial estimates place the death toll at about 50. At least 50 houses were washed away and a thousand others damaged. Upwards of 1000 persons have been rendered homeless. The damage is variably estimated up to £250,000. The waters of the river have subsided.

Premier Lloyd George sent a message to the mayor of Louth, asking what assistance the government could render. The fury of the storm which caused the overflow of the Lud centered about Louth, but it swept across the country, its tracks being from north Wales to Shropshire, thence to Lancashire and Lincolnshire and subsequently to Cambridgeshire, where it expended its fury. Floods were experienced in many districts. Numerous cattle were drowned and much material damage has been reported.

Baseball

OPENING OF PONOKA'S GROUNDS

Lacombe Suffers Defeat in Eight Innings' Game

The opening ball game of the season, as well as the opening of ball grounds, drew a large crowd Tuesday evening, when Lacombe tried conclusions with our local boys.

As will be seen by the line-up, there are several new players on Ponoka's team, and it is expected that, with practise together, they will make a formidable aggregation. The game was well worth seeing, and the spectators especially, were most enthusiastic. At the close of play the score stood 8 to 1 in Ponoka's favour, eight innings being played.

Ponoka's line-up was—

Headley, 2nd; Hambley, c; A. Mullins, ss; Wilkins, 3rd; Campbell, rf; Russell, cf; W. Mullins, 1b; Longman, lf; Rohwer, p.

Umpire: J. Richmond.

TWEED

Taxation and the Budget

The government at Ottawa has at last decided that the time has come to call a halt to further large borrowings and consequent increases in the national debt, that the current revenue of the country must be augmented sufficiently to cover all ordinary and capital expenditures, including interest on the public debt, pensions, railway deficits, etc, that, in fact, a beginning must be made in reducing the national debt. As has been pointed out in this column on other occasions, the desired result can be brought about in two ways, or rather by a combination of both—revenue to be increased to cover expenditures, expenditures to be decreased until they are balanced by revenue, or, and this is probably the only safe way, revenues to be increased and expenditures decreased until they balance.

The government has decided to curtail expenditures for the time being by postponing the carrying out of certain public works. These, however, are only deferred. But the government does not appear to have gone very far in the direction enforcing a more rigid economy in the cost of administration. There are still too many over-lapping departments and branches of the public service; still too many civil servants drawing salaries for the amount of work to be done; still an almost criminal waste of money in many ways. There is an absence of courage at Ottawa in tackling this great problem of governmental expenditure.

On the other hand, the recent budget does contain evidence of some degree of courage on the part of the new finance minister in the raising of a larger revenue by taxation. No finance minister and no government likes to impose new and heavier taxation, but it must be done if Canada is to honorably meet the obligations which the war has thrust upon it. The people of Canada realize this, and they are ready to pay, just as they were ready to fight and sacrifice that the war might be won. All they ask is that the taxation be levied in a fair and equitable manner, based on the principle that those best able to pay shall be made to do so, and that those enjoying less in the way of material wealth shall be let off as lightly as possible.

While there is criticism of some details of the new taxes, and a very general belief that some articles, which, under the prevailing conditions and prices, are actual necessities, have been classified as luxuries, there is a very general approval of the principle of imposing a tax on luxuries, of increased stamp duties, of an increase in the tax on incomes in excess of $5,000. These are steps in the right direction.

From the standpoint of the agriculturist producer and the great mass of the consuming public, however, there is real ground for criticism that some action has not been taken to encourage the work of primary production throughout the Dominion by reducing the tariff burden imposed on instruments of production. Increased production would so greatly add to the wealth of the country that the increased purchasing power of the people would more than offset any decrease in customs revenue resulting from lower duties on the implements imported to promote that large production.

The presentation of the budget again brings to the fore the necessity of some amendment to the rules of procedure in the house of commons whereby it will be possible to offer more than one amendment to the budget resolutions. At present only one amendment is allowed, with the result that any member, or group of members, who do not favor the main motion, that is the budget itself, and who do not consider that any amendment offered goes far enough, or too far, in proposing changes, are precluded from offering an amendment to the amendment setting forth their views on the question. One amendment and one only is allowed, with the result that no opportunity is afforded of presenting a third alternative policy.

This rule last year operated to prevent the Farmers' group from submitting their views to Parliament and the country, and compelling the members at Ottawa to record their votes thereon and make their position clear before the electorate. Unless a change in the rules is effected, the same thing will occur this year. In almost all deliberative bodies an amendment to an amendment is accepted. It should be in the house of commons on the budget. Everybody will recognize the necessity for some limitation if the transaction of public business is not to be unduly delayed, but an amendment to an amendment is a safe limitation. Limitation to a single amendment only is too strict, and operates to the disadvantage of the country and prevents reasonable and legitimate discussion and presentation of views on the most important of all public questions, namely, the imposition of taxation on the people. It is time the rules were amended in respect to amendments to the budget.

WHEN BABY IS SICK

When the baby is sick—when he is cross and peevish, cries a great deal and is a constant worry to the mother—he needs Baby's Own Tablets. The Tablets are an ideal medicine for little ones. They are a gentle but thorough laxative which regulates the bowels, sweetens the stomach, banish constipation and indigestion, break up colds and simple fevers and make teething easy. Concerning them, Mrs. Philippe Payen, St. Flavien, Quebec, writes: "Baby's Own Tablets have been a wonderful help to me in the case of my baby and I can strongly recommend them to other mothers." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

For Government Merchant Marine

Will Select Boys From the Canadian Navy League

The nucleus of a Canadian personnel for the Canadian merchant marine is provided for in an agreement which has just been concluded between the Canadian Government Merchant Marine, Limited, and the Navy League of Canada and Montreal will provide the first recruits for the national shipping.

R. B. Reakie, general manager of the Canadian Government Merchant Marine, states that boys will be taken from the navy league, and two of the most promising candidates will be selected for each ship to be trained as deck officers. Instead of payment of a premium, each boy will, under the terms of the agreement, earn $100 the first year; $200 the second; $300 the third, and $500 in the fourth year, plus his board.

Germans Urged to Work Hour More

Germans are asked for "an extra hour of labor daily to save the fatherland," by Dr. Bernhard Dernburg, in an article in the Tageblatt. Based on statistics which indicate an average working day of 9½ hours, Dr. Dernburg calculates an eight-hour day will result in a loss of production of 27,000,000 marks annually, which, if saved, he says, would produce the clothes and raw material in plenty and also insure a better rate of exchange.

A bluff on the Virgin River, Nevada, more than 25 miles long, is composed of 60 percent salt of great purity.

SUNDAY SCHOOL LESSON

LESSON FOR JUNE 6

SAUL'S FAILURE

This is one of the saddest pictures in Bible history. No one has had a brighter prospect before him than Saul, yet no one has made a greater failure. He possessed strong natural gifts, the qualities of a great king. He had a fine physique, which greatly favors one's success in life, other things being equal. He had the benefit of Samuel's advice and godly life, which was of inestimable value.

I. The Command to Saul (vv. 1-3).

He is commanded to utterly exterminate the Amalekites, leaving neither people nor booty. The reason assigned is their evil treatment of the Israelites as they came up out of Egypt (Ex. 17:8; Deut. 25:17). This command may seem cruel, but we must remember that it was given by the Lord, who has the right to kill or to make alive. The wickedness of the people was very great. Their judgment was only such as their sin deserved. It was not Israel's act, but God's act, Israel only being the sword in his hand.

II. The Disobedience of Saul (vv. 4-9).

He renders a partial obedience. Agag, the king, is spared and the best of the goods is appropriated. The purpose of God's thoroughgoing command was to show that it was a warfare of judgment for wickedness, not for greed. Saul only obeyed as far as his inclinations led him. The obedience to God which is limited by the heart's inclination is the worst kind of obedience.

III. Saul Rebuked by Samuel (vv. 10-25).

1. Samuel cried to God (v. 11). The news of this disgraceful act greatly disturbed Samuel, causing him to cry to the Lord all night.

2. Saul's hypocritical pretense (vv. 15, 6). Saul met Samuel with the pretense of having executed the Lord's commandment. This pretense carried a lie upon its face. Those who are the most willing to speak of their obedience are the ones who are conscious of their disobedience, and their consciences trouble them over it. Though disturbed by a guilty conscience he tried to conciliate Samuel, the prophet, but the very bleating of the sheep and the lowing of the herds betrayed him. Thus betrayed, he tried to shift the blame upon the people (v. 15). This is always the way. It matters not what the crime may be, some excuse can be made for it. He then played the hypocrite by trying to make it pass as an act of devotion to God (v. 15). He should have known that things refused by disobedience to God are an abomination to him. Offerings to God of ill-gotten gains can never atone for sins of disobedience and neglect. Saul tried to justify himself by pleading that he was keeping the spirit of the commandments while not literally carrying out its requirements. He has many successors today who do not believe in the literal interpretation and practice of God's word.

3. Samuel rehearses before Saul God's dealing with him (vv. 17-23). Samuel met this hypocrisy by bringing Saul to squarely face his sin. God is more concerned in having his subjects render obedience unto his commandments than he is for them to offer unto him sacrifices. Such an act when the heart is in rebellion is as hateful to God as witchcraft and idolatry.

IV. The Judgment upon Saul (vv. 26-35).

For the presumptious offering of sacrifice in dynasty to defend from Saul's house, and for this act of flagrant disobedience the kingdom is rent from him. It is taken from Saul and given to his neighbor, who is better than he. He confessed his sin and begged Samuel to still honor him before the elders of the people. This further shows his self-centred life. His honor was more to him than the glory of God. Samuel forsook him and left him alone to suffer in disgrace. He refused to punish the Amalekite (II. Sam. 1:10). Unless we slay our enemies they will slay us. Judgment shall come sooner or later upon those who sin, for "the wages of sin is death, but the gift of God is eternal life through Jesus Christ our Lord." (Rom. 6:23).

Vegetables for Medicine

Watercress is an excellent blood purifier. Lettuce has a soothing effect on the nerves and is excellent for sufferers from insomnia.

Tomatoes are good for a torpid liver, but should be avoided by gouty people.

Celery and onions are nerve tonic.

Spinach has great aperient qualities and is better than medicine for constipation.

Beets are fattening and good for people who want to put on flesh, so are potatoes.

Parsnips possess the same virtues as sarsaparilla.

A shark six feet long was recently caught by a girl fishing with an ordinary hook and line in Bude Bay, Cornwall.

Edison says we shorten our lives by overeating. Any man who can shorten his life by overeating at present prices will die envied by all.

New Principal for Agricultural College

High Post is Given to Prof. Bracken Of Saskatoon University

John Bracken, professor of field husbandry at the University of Saskatchewan, Saskatoon, for the last 10 years, has been appointed principal of Manitoba Agricultural College to succeed Dr. J. B. Reynolds, who resigned his position to become principal of the Ontario Agricultural College at Guelph.

Professor Bracken, during his term at the University of Saskatchewan, has been one of the outstanding figures in the province among those who worked for the advancement of agriculture. As superintendent of fairs and farmers' institutes, he has done notable work and his publications, which include a number of circulars on various phases of crop production in western Canada, have been eagerly sought by every farmer of note in the province.

Sale of Wheat

Canadian Farmers Will Receive Over Three Million Dollars

It is understood that a settlement has been reached in the disagreement between the Greek Government and the Canadian government over the wheat prices. As a result, it is said, Canadian farmers will benefit to the extent of three and a quarter million dollars, or the difference of fifty cents a bushel between $2.50 and $3.

The increase in the amount which the Greek government has agreed to pay for something like 6,600,000 bushels of wheat was secured chiefly through the effort of the Canadian Wheat Board and the Canadian Trade Commission, which has its headquarters at Ottawa. Sir Charles Gordon, of Montreal, and Rhys D. Fairbairn of Toronto are the commissioners.

The dispute is said to have arisen through a misunderstanding as to the exact interpretation of an agreement between the Greek plenipotentiaries and the Canadian trade mission which was headed by Lloyd Harris.

Glaring Headlights

Saskatchewan Police Notified to Enforce Provisions of Motor Vehicles Act

Several complaints by motorists and people who do not drive motor cars have reached the headquarters of the Saskatchewan provincial police and strict instructions have been issued by all inspectors in charge of the divisions to their men to have all motor car drivers comply with the section of the Motor Vehicles Act, which requires dimmed lights.

"The complaints have been mostly from rural districts where motorists are alleged to be using glaring headlights and causing some trouble on the roads at night. Accidents have been narrowly averted recently when the eyes of drivers became blurred from the strong light thrown from oncoming autos.

All provincial police officers have been instructed to keep a strict watch for the lawbreakers and to make them comply with the regulations. A general appeal is made to all auto owners by the provincial police to set things right with regard to lights, otherwise offenders will have to be taken to court.

MOTHER!

"California Syrup of Figs" Child's Best Laxative

Accept "California Syrup of Figs" only—look for the name California on the package, then you are sure your child is having the best and most harmless laxative or physic for the little stomach, liver and bowels. Children love its delicious fruity taste. Full directions for child's dose on each bottle. Give it without fear.

Mother! You must say "California."

A Rap at Reggie

Reggie.—That stunning looking girl over there has been gazing at me for the last ten minutes. She must be trying to make an impression.

Miss Keen.— Very likely; people generally use something soft for that purpose.—Boston Transcript.

Wireless Experiments

Conducted by French Sloop Cruising In Pacific

Valuable experiments in wireless telegraphy are being conducted by the French war sloop Aldebaran, which has been cruising in the Pacific near the Chatham and Bounty Islands. Lieutenant Guierre, wireless expert, will probably submit the result of his experiments to the international wireless conference in Washington shortly. He states that the wireless "reception" in New Zealand from the French instruments is of special interest to continental experts, as New Zealand is practically the antipode of France. It is claimed that the Aldebaran is carrying out for the first time a truly comprehensive system of measuring the strength of "receptions," although an American had pioneered the way in this respect.

Found Relief When Doctors Had Failed

MANITOBA WOMAN PRAISES DODD'S KIDNEY PILLS

Mrs. Murmylo Says to All Who Suffer From Bladder Trouble: "Try a Box of Dodd's Kidney Pills.

Brokenhead, Man., May 31st.—(Special)—Strong in her praises of Dodd's Kidney Pills is Mrs. Mary Murmylo, a well known and esteemed resident of this place. And Mrs. Murmylo gives her reasons.

"Two years ago I suffered from bladder trouble," she says. "I tried all kinds of medicines and two doctors in Winnipeg. All the doctors and medicines failed to help me.

"I turned to Dodd's Kidney Pills and used eight boxes of them and found them satisfactory. I give every praise to Dodd's Kidney Pills, and to any person suffering from bladder trouble I say, 'Try a box of Dodd's Kidney Pills.'

Dodd's Kidney Pills act directly on the kidneys. By putting them in condition to do their full work they relieve bladder troubles and send pure blood and good health coursing to all parts of the body.

Ask your neighbors if Dodd's Kidney Pills do not relieve kidney ills and those diseases that spring from sick kidneys.

Egg Inspection in Canada

Maximum Allowance Is Twelve Eggs Per Case Below Grade Stated

According to government statistics recently issued, during the latter half of the month of March 650,000 dozens of eggs, in other words, 45 carloads, were inspected under the Dominion's regulations. The carloads were pretty evenly distributed between the east and west. The demand for inspection is gaining in popularity as both buyers and sellers have seen the benefit of handling eggs according to grade and subject to inspection in inter-provincial trade.

A Remarkable Bird

Sought A Haven on A Vessel 900 Miles From Land

The strange story of a bird's attempted trans-Pacific flight was received at Victoria, British Columbia, together with its hero—or was it a heroine? — when the liner, Tajima Maru of the Nippon Yusen Kaisha line docked at its wharves lately. The feathered entrant, according to the solemn testimony of the crew, was picked up fully 900 miles out from Victoria and had selected the deck of the vessel to land on when its enthusiasm and energies had waned. When ministered to by the sailors it proved quite tame, and showed no inclination to resume its record flight—and since the boat was then about 1,000 miles from land, can we blame the bird?—Christian Science Monitor.

Aviator Flies Over Illimani

La Paz, Bolivia. — Lieut. Donald Hudson, the American aviator who was engaged by Bolivia last year to organize a flying corps for the Bolivian army flew over Mount Illimani, the lofty peak of the Bolivian Andes. When he descended his machine was covered in ice. In the flight his mechanician, who flew with him, became unconscious.

Large Increase in Wool Looked For

Association Encouraging Growers To Get Together and Ship In Car Lots

Approximately 375 contracts have been entered into this season by growers in the province of Saskatchewan, and the Canadian Co-Operative Wool Growers, Ltd., under which the growers' clips will be marketed through the co-operative. These contracts represent over 31,000 sheep and over 221,000 pounds of wool already definitely in sight. Approximately 150 contracts have been received from Manitoba. This showing is as good, and possibly better than the average at this time of the season in past years, according to the district manager of the Co-operative Wool Growers' for Manitoba and Saskatchewan. "I anticipate an increase of 100,000 pounds of wool handled this year over last," he states.

The association is encouraging the wool growers of the western provinces to get together this year and ship in car lots (e.g., 20,000 pounds) from local points. Wherever they will do so, a special representative of the co-operative will be sent to take delivery of the wool as it is loaded and ship it direct to the warehouses. The object of this procedure is to materially lessen freight charges and handling expenses.

Soap Worth Five Cents

Has Seven Wrappings, So Sells For One Dollar

Useless tinsel and other things to catch and deceive the purchaser's eye and so telegraph to his or her brain the false impression that the contents of a package are worth the enormous price charged are among the causes for the high cost of living. Would not candy taste as well if sold in a plain box, unadorned with expensive trimmings. But who would pay from $1 to $3 for a pound of candy unless it was proportionately "dolled up" in accordance with what is au fait?

France complains even more than America of this expensive habit of manufacturers. A Frenchman says:

"Take a stick of shaving soap, for example, weighing about two ounces and worth perhaps five cents. It was sheathed in heavy tinfoil, then wrapped in greaseproof paper and folded around with 'artistic advertising matter,' explaining that when you bought somebody's 'savon pour la barbe, you knew you were sure of getting real soap and nothing but soap—an obviously untruthful statement.

"The shaving stick thus apparelled was placed in an aluminium tube, itself lined with thick paper, and to protect not the soap but the tube, was an outside covering of tissue. Finally the whole was packed in a neat carton, and to protect that there was another covering of paper. Seven wrappers and a metal case all for one poor little scrap of soap! The retail price was nearly a dollar.

Development of Abandoned Farms

The Western Michigan Development Bureau, a semi-official organization, launched a campaign to bring into production a part of Michigan's 18,000 abandoned farms. In cooperation with real estate firms and employment agencies, the plan calls for recruiting surplus labor in industrial centres and the placing of these men on fully-equipped farms.

Guernsey Cow Brings $17,700

A record price of $17,700 for a Guernsey cow was paid at a sale of cattle, held at Midlothian, Illinois, in connection with the annual meeting of the American Guernsey Cattle Club.

That man never lived who can repeat the ten commandments while removing a porous plaster from his anatomy.

Stop Entry of Imbeciles Into Canada

Staff of the Medical Immigration Inspectors is Doubled

The recent appointment of a number of extra medical inspectors in connection with the immigration into Canada is understood to be consequent upon the representations of public health bodies throughout Canada that many imbeciles were being admitted to Canada without proper inspection. The staff of medical immigration inspectors has been more than doubled and every precaution is now being taken to prevent incurable imbeciles from entering the country and becoming a public charge.

Fifty percent of the patients in an asylum in British Columbia are said to be recent immigrants. Four of them are said to have been admitted at Atlantic ports, after they were refused admittance to the United States. In answer to inquiries on the point, the Dominion health department stated that there was no lack of precaution at the present time and modern scientific tests were being made by competent alienists at ports of entry.

Minard's Liniment Lumberman's Friend.

Too Few Producers

In the United States now are too many people buying and selling things— many of them rebuying and reselling the same things— and too few workers producing things. Principally to that fact the country is indebted for the present extravagant cost of living. Is it not time to begin the progress of selection of immigration that will give the country good producers of things rather than mere sellers of things?—Chicago News.

Saskatchewan Highways Program

Notice is given in the Canadian Gazette that a program on highways to be constructed or improved in Saskatchewan has been filed with the department of railways and canals. A copy may be seen in the office of the minister of highways at Regina.

After house-cleaning

freshen up your floors with

Kyanize

Don't use a floor finish which will leave unsightly worn spots after a little wear. Kyanize is made especially to stand the scuff and tread of heavy shoes, without cracking, peeling, or turning white. It is a *coated* finish, instead of a mere mixture.

Kyanize also makes a beautiful, sanitary, most durable finish for furniture and all woodwork about the house.

Seven artistic colors, and clear; also white enamel

Come in and get a small can of Kyanize and give it a trial. The makers guarantee it absolutely, and so do we.

A. A. GRAHAM

JOTTINGS OF TOWN AND DISTRICT.

Local News.

Mrs L. Headley was an Edmonton visitor this week.

Rev. Mr Luck is visiting points in the Manville district.

Mrs A. Mullins is enjoying a visit from her brother, Harry Isenhouer, of Los Angeles, California.

Miss E Slater, of Calgary, was a guest of Miss Courath for a few days last week

Dr. and Mrs Budd are making an automobile trip through part of Saskatchewan, and will not return until Friday or Saturday.

Mrs A. Lawrence left Thursday on a visit to her old home in Aberdeen, Scotland. She expects to be away for the summer, and no doubt will have a pleasant sojourn.

Mr and Mrs Geo. E. Bowker and family left on Saturday for the east, where they will visit in Ontario and Quebec, likewise several points in the States. They expect to make the return trip by automobile.

Captain May, of Edmonton, paid our town a visit with his aeroplane on Thursday. He was en route to Lacombe, and carried a lady passenger in the person of Miss Mabel Morris. Miss Morris enjoyed the trip immensely, and is looking forward to another like experience.

Mrs Fred Sparber has received the sad news of the death of her mother, which took place on Friday, the 28th. Deceased visited her daughter here, and made a number of friends. The remains were buried in Spokane, Wash.

Owing to failing health J. P. Horn has been obliged to give up work, and has rented his blacksmith shop. He has paid close attention to business during the twenty odd years he has been here, and he certainly deserves a rest. His friends will wish him a speedy recovery.

After the busy seeding season is over, it will be—or should be—coal word. With the amount of snow and heavy rains practically all our roads are claiming attention. Give us good roads and the farmer and his wife will throw off that worried countenance they carry along with them when driving to town.

The Baptist Convention of Alberta will be held in Calgary, June 15th to 19th. Rev. Dr. J. M Campbell, late of Vancouver, now of New York, has just returned from a trip around the world, visiting missions in Japan, Korea, China and India. He will give several addresses. Dr. Erb, of Philadelphia, a Sunday school expert, will be one of the chief speakers This will be one of the most important conventions ever held by Baptists in Alberta, and a very large attendance of Baptists from all parts of the Province is expected.

Dr. Mecklenburg, eye specialist, will be at the Royal Hotel, Ponoka, on Thursday, June 17th.

Dan Blakley visited with friends in town for a day or two last week.

BRANNER.—On Sunday, May 30, to Mr and Mrs J. F. Branner, a son.

SCOTT.—On Monday, May 31st, to Mr and Mrs Wm R. Scott, a son.

Lacombe bull sale, held last week, was well attended by Ponoka farmers. Prices were good on the average, and several fine animals were brought to this district.

The first of June, and a nice change has taken place in weather conditions. About 90 per cent of the seeding is done, and the grain is showing up nicely. Of course the season is backward, but given good warm weather, vegetation should come along at a great rate There is ample moisture in the soil, and now give us sunshine.

There are only a few days left in which boys and girls, who intend showing calves and pigs at the Ponoka Fair, may enter the competition. All entries must be in by June 10th. If you are going to be one of the lucky ones telephone your intentions to Mr Clarke at the Bank of Commerce, and he will hold your entry until you can call and sign the form.

The official schedule of the Central Alberta Amateur Baseball League is given in another column of this issue It will be seen that the season will be an interesting one, and there should be some fine exhibitions of ball given in the several league games to be played here. The Herald has reason to believe that Ponoka will have a very fine team this year. Interested parties should retain the schedule and become familiar with the dates.

Dr. Foster, Chiropractor, will be in attendance at the home of L. V. Bailey, Bismark, on the forenoon of Monday, Wednesday and Friday of each week.

Thursday night picture shows will be discontinued for the present. The "Great Gamble" serial will commence on June 8th, and there will also be a full show in addition to the serial.

The Herald has been asked to publish the following—"How about the north road? It is in a ridiculous condition through mere neglect With the high cost of vehicles and taxes, one would think that something would be done. The road drag, if it had been used at the proper time, would have done away with all this inconvenience. Those in authority should begin to wake up."

The Grand Meadow local, U.F.W.A., will meet in the schoolhouse on Thursday afternoon, June 10th.

End-gate of Ford truck lost between Russell's corner and R. German's farm. Finder please leave same at Milton's garage.

Dance on Friday evening, June 4. Dancing from 9 to 12.30.

BABY COVERED WITH ECZEMA

When 4 Days Old. Cross and Cried. Cuticura Heals.

"My baby brother had eczema which began when he was about four days old. It came in little pimples and then a rash, and he was covered. He was so cross that he could not sleep, and he cried.

"This lasted about two months before we used Cuticura. It helped him, so we bought more, and he was all healed after we had used two cakes of Soap and two boxes of Ointment." (Signed) Miss Almeda Williams, Young's Cove, N. B., May 22, 1918.

Use Cuticura Soap, Ointment and Talcum for all toilet purposes.

Soap 25c. Ointment 25 and 50c. Sold throughout the Dominion. Canadian Depot: Lymans, Limited, St. Paul St., Montreal.

Cuticura Soap shaves without mug.

Love of The Wild

— BY —

ARCHIE P. McKISHNIE

Printed by Special Arrangements with Thos. Allen, Toronto, Ont.

(Continued.)

A pair of woodcock arose from a swale and passed between him and the water. Against the moonlight their bronze breasts flashed out for a second and faded, and their mellow wing-notes reverberated dyingly from the shadow. Right across their track a flock of duck came speeding, their goal the reedy ponds of Rond Eau Bay.

"Joe," the young man said wistfully, "it's funny, isn't it, now? Some goin' and some comin'. Woodcock flying south 'cause they hate the cold; ducks flyin' north 'cause they love it."

They passed on, the dog taking the lead. At the edge of a wide clearing they paused alert. The dim out-line of a log house lay before them. From the windows streamed the glow of a candle-light. Across the open from the house a figure was advancing, and to the dog's low growl the boy child-ed a whisper, "Be still, Joe." When the figure came close to where they waited the boy stepped out and stood before it. His arms were folded tight across his breast and his mouth narrowed to a thin line.

"Did you tell her?" he questioned, quietly. The tall man thus accosted stepped back with a startled exclamation.

"Well, Boy McTavish, is it you?"

Young McTavish, half crouched, then quickly drew himself up again.

"Yes, it's me, teacher," he said. "What I want to know is, did you tell her?"

"Yes, I told her?"

"All right, get out of my way, then."

"Wait a moment, Boy," returned the man. "You understand, don't you, that it is my duty to report all pupils who do not attend school regularly?"

The boy changed his position so that the moonlight would fall full upon the face of the man before him.

"Do you suppose I care for your reportin' me?"

The tone was wondering, contemptuous.

"Why, teacher, you can't hurt me, and you know it. Do you suppose I was thinkin' of myself when I asked you not to tell her? And do you suppose any man would have done what you've done?"

"Hush," warned the other, "I can't let you talk to me in this way, Boy. Remember who I am. I won't have it I say."

"Well, I can't see how you're goin' to help it. I want to tell you somethin', Mr. Simpson, and you've got to listen. Don't you move or by God I'll sic Joe on to you. I'm goin' to tell you again what I told you before. Ma's sick in bed and maybe she ain't never goin' to get up no more. I told you that, remember?"

"Yes, you told me that—well?"

"Well, she's been thinkin' that I've been to school and you and me know I haven't. I couldn't stay in your school and live, but I was willin' to take the hick'ry or anythin' you said, if you wouldn't tell her."

The teacher was silent.

"Pup," said the boy, "see that he answers up better."

The dog growled and the man spoke quickly.

"I was only doing my duty."

"And it's your duty to tell a dyin' mother that her boy's goin' to hell—I say goin' to hell, and her so near the other place? Do you call that duty?" demanded the boy bitterly.

The moon floated further into the open, lighting up the two; the boy erect and accusing with the shaggy dog beside him, and the tall man before them in an attitude half defiant, half ashamed.

MURINE Heals, Refreshes, Soothes, Heals—Keep your Eyes Strong and Healthy. If they Tire, Smart, Itch, or Burn, if Sore, Irritated, Inflamed or Granulated, use Murine often. Safe for Infant or Adult. At all Druggists in Canada. Write for Free Eye Book. Murine Company, Chicago, U. S. A.

"I didn't quite understand, Boy," apologized Simpson. "I am sorry; believe me I am. No, I didn't understand."

"And you never will understand. You're maybe all right in your own world, teacher, but you ain't at home in ours. You don't fit this place, and there ain't no use of you ever tryin' to understand it or us. Teacher, you take my advice—go back to the clearin'."

The boy spoke slowly, weighing each word and closely watching the face upon which the white moonlight fell. It was a young face, not many years older than his own. But it was weak and conceited. It grew sullen now, as the significance of young McTavish's words became apparent.

The man turned toward the path to the creek, and the boy stood tall and straight before him.

"Of course, you understand why us Bushwhackers can't be friends with you, teacher," said the boy. "It's because you are one of them—and they are doin' all they can to break into our little world."

He pointed toward the open.

"Out there is where they belong; them and you. Go back there, teacher, and tell them to go. It's best, I tell you—best for everybody."

Away down across the clearing on the far bank of the creek, a burst of yellow-red light fluctuated against the skies, and the metallic ring of a saw twanged out, silencing the whip-poor-will's call. Colonel Hallibut's mill was running overtime. All this stimulated that restlessness that had likely been born in the soul of the young bushwhacker. He stepped out from the shadow and shook his fist at the red glow.

"Damn 'em," he cried. And paying no heed to the figure which stood, with bowed head, on the path, he stepped away across the clearing toward the pale light streaming from the log-house window.

CHAPTER II.

Boy opened the door and passed silently inside. Beside the wide fireplace the long gaunt figure of a man was bent almost double. He had a thick shock of sandy hair tinged with gray. His be-whiskered face was hidden behind tobacco smoke. A time-stained fiddle lay across his knee, his sock feet rested on the hickory fender, and the ruddy glow of the log fire threw a grotesque shadow of him against the white-washed wall. A pair of high cow-hide boots, newly greased and shined, rested on his one side, while a piece of white second-growth hickory, crudely shaped to the form of an ax-handle, lay on the other. In one corner of the room a bunch of rusty rat-traps lay, and across deer-antlers on the wall hung a long rifle, a short one, and a double-barreled fowling piece.

The lad simply glanced at the man without speaking, and taking the dipper and wash-basin from the bench, passed outside again. When he re-entered, a girl of about eighteen years of age was pouring tea from a pewter pot into a tin cup. Her face was toward him, and a smile chased the shadow from the lad's face as his eyes rested upon it. He dried his hands on the rough towel hanging on the door and crossed over to the table. He drew back the stool, hesitated, and asked of the girl in a low tone:

"Is she sleepin', Gloss?"

The girl shook her head. Her hair was chestnut-brown and hung below her waist in a long, thick braid. Her eyes were large, gray, and long-lashed like a fawn's.

"You'd best not go in yet, Boy," she said. "Granny's readin' her the chapter now."

"I'll just go in for a minute, I guess."

He entered the inner room and stood gazing across at the low bed upon which a wasted form rested. An old woman sat beside the bed, a book in her blue-veined hands. When she closed the book, Boy advanced slowly and stood beside the bed.

(To be continued)

Why the Sky is Blue

English Professor Explains Why and Cause of Wind Sound

What makes the blue sky and the glorious hues of sunset? Professor Bragg has given the answer in a lecture on "Sounds of the Country" at the Royal Institution, London.

The blue sky, he explained, was due to the interception by particles in the atmosphere of the blue rays which form a part of the white light of the sun. The parts of white light conveyed by longer red and yellow light waves managed to jump the many substances in the atmosphere and were seen at sunset.

He showed a disc of light on the screen which, passing through a bowl of water, became gradually redder as the water got cloudier, till at last, after an imitation of the sun in a November fog, it faded away.

Another clever experiment showed how the wind made sounds in the trees. A stick put into a revolving bowl of water set up little whirlpools behind it. In the same way, the wind rushing past trees formed whirlwinds on a small scale, and these caused those sounds so admirably described by the imitative word "sounding." Similar sounds are set up by telegraph wires.

In the eruption of 1768 the Cotapaxi sent ashes 130 miles.

British Methods of Destroying Mines

Those Washed Ashore Are Rendered Safe by Experts

Sir James Craig, financial secretary to the admiralty, in a written parliamentary answer to Brigadier-General Surtees, outlined a method of dealing with drifting mines.

First, a destroyer from the nearest naval base investigates all the authentic reports of drifting mines.

Second, the fishery protection flotillas stationed on all principal fishing grounds destroy all drifting mines met with.

Third, all merchant and fishing craft, with few exceptions, are supplied with rifles and ammunition, on application for mine destroying.

Fourth, experts in rendering mines safe are stationed at different places round the coast, who render safe all mines washed ashore.

No vessels are solely employed in searching for drifting mines. The number of drifting mines destroyed by His Majesty's ships from February to May 1 was 26.

Lynching to be Abolished

South for Square Deal for Blacks, Says Educator

Prediction that the next two years would see lynchings and mob violence wiped out if whites and blacks only "keep their feet on the ground and maintain level heads in these days of stress and strain," was made by Dr. Robert R. Moton, principal of Tuskegee Institute, in an address before the Southern Sociological Congress.

"I think I know what I am saying," said Dr. Moton, "when I say that there never was, not only a more friendly attitude toward the negro, but there never were so many white people in the South who are not merely desirous that the negro shall be fairly and justly dealt with, but who are determined that he shall have a fair chance. This growth in sentiment with respect to seeing that the negro gets a square deal is reflected by the determination of such a large number of Southern Governors to put down mob violence and to see that the negro gets justice. As a result of this growing sentiment I expect to see in the next few years lynching and mob violence wiped out."

Records at Tuskegee Institute, Dr. Moton said, show that thus far this year there had been six lynchings compared with eighteen for the same period last year.

Hid in Germany for Five Years

Jules Reant, a farm laborer listed as a deserter since the end of August 1914, has been arrested at Lille. It developed that he had been secreted in Germany for five years in a farm granary near the village of Auchel in the department of Pas de Calais.

Neighbors kept Reant supplied with food and also kept his hiding place secret during the war, even the Germans who passed through not discovering him. It was learned Reant left his self-imposed confinement in July last after five years of solitude.

Evading Consequences

The Justice of the Peace.—Do you take this woman to be your lawful wedded wife? The bridegroom.— I do. The Justice.—Then I pronounce you man and wife. And remember, you asked me to do this. Don't ever blame me.

England has consented to give France twenty-five percent of the output delivered from the oil wells in Mesopotamia and the Near East.

FALLING? HERE'S WHERE IT SHOWS

Don't worry! Let "Danderine" save your hair and double its beauty

To stop falling hair at once and rid the scalp of every particle of Dandruff, get a small bottle of delightful "Danderine" at any drug or toilet counter for a few cents, pour a little in your hand and rub it into the scalp. After several applications the hair usually stops coming out and you can't find any dandruff. Your hair will grow strong, thick and long and appear soft, glossy and twice as beautiful and abundant. Try it!

Gold Discovery is Reported

Reports of the discovery of gold in northeastern Siberia have reached Nome, and many boats are awaiting the opening of navigation in readiness to carry men to the new fields.

Returned Soldiers Flock to the Land

Large Numbers Are Making Their Homes in The Prairie Provinces

During the past eighteen months, large numbers of returned soldiers have availed themselves of the assistance given by the Canadian government and a large percentage have have shown their appreciation of the opportunities which the west offers by making their homes in one of the prairie provinces.

The following figures will give an idea of the material help given to soldiers who have settled in Saskatchewan as compared with the total expenditure for that purpose throughout the whole Dominion. On the 10th of April the Soldier Settlement Board had approved loans amounting to $12,533,711 for settlers in Saskatchewan out of a total of $59,894,115 for the whole Dominion, the number of loans being 3,162 out of 15,540. There are in Saskatchewan 2,869 established settlers out of 13,497 for the Dominion and 9,266 men qualified as settlers out of a total for the Dominion of 37,005. Saskatchewan also has 89 men in training out of a total of 617.

Out of $60,000,000 in loans approved, $32,704,744 is for purchase of land, $1,850,944 for the removal of encumbrances, $6,569,458 for permanent improvements and $18,768,969 for stock and equipments.

A return issued by the board shows that soldier grant entries have been made by 6,625 returned soldiers on free land in the western provinces.

Motherless Chicks Should be Kept Busy

Mother Hen Always Keeps Family On the Move

A keen poultry observer will tell you that a mother hen is always busy keeping her family on the move all day long, excepting for short periods of rest. Evidently she knows her business, because she usually has a very vigorous family by the time they are ready to shift for themselves. Undoubtedly the feed and the way it is fed is the cause of more bother than any other one single factor. Many mistakes are continually made along these line due to a lack of information or to the careless application of the same. A chick hatched in an incubator should develop in a normal way if the machine is properly run. He should come from the shell just as naturally and just as strong as if the mother hen had done the hatching. But to keep him strong and vigorous is the big problem of the feeder.

Canada Sells War Supplies

Surplus Stores Disposed of by the Various Governmental Departments

According to a return laid on the table of the House of Commons recently a total of $6,947,010.12 in surplus stores was disposed of by the various governmental departments through the war purchasing commission between December 1, 1918 and March 31, 1920. The department of militia and defence sold a total of $5,852,747.75 in stores, which included blankets, woollen and cotton piece goods, and footwear. The sale of goods commenced in December, 1918, and practically all goods were offered for sale by tender. In many cases the offers were too low for acceptance and price lists had to be prepared and advertised. Sales had been made in this latter manner since the first of January.

Awards for Naval Inventors

Gratuities For Special Services Have Amounted to Large Sum

The Navy Appropriation account for 1918-19 recently issued, gives a list of gratuities paid for special services, amounting to £134,901. The sum of £10,000 was paid for an invention of hydrophones, £7,000 for a patent bullet, three awards of £5,000 each for connection with coaxial motor boats; £2,500 for an invention of silvering mirror process; and £500 for an invention in improvements in roll and depth recorders. The gratuities for sinking and destroying enemy submarines amounted to £5,184 7s; and those for sinking mines £39,-883.18 5s. The awards to crews of the mercantile marine for services and minor special gratuities were £45,203 11s. 11d.

Goat Breeders Meet

There are over 300 persons interested in goat breeding in British Columbia, nine-tenths of Canada's goat-men living west of the Canadian Rockies according to a comprehensive report read at the annual meeting of the Canadian Goat Breeders' Association, held in Vancouver recently.

Commencing early next year, it is the intention of the Dominion Government to record the milk yield of registered goats, so that the industry may be placed on somewhat the same plane as that of the dairy cattle. The prospects for the future are declared to be exceedingly bright, more particularly as the scrub buck has been all but eliminated.

Advance Transportation For Domestics

Manitoba Government Will Help To Bring British Women Into The Province

As a result of representations made to the Manitoba provincial government by Charles Robson, who has recently returned from Great Britain where he was sent by the federal department of immigration, to enquire into the outlook for the emigration of British women to Canada, Hon. Valentine Winkler announced the intention of the Manitoba government to undertake a policy of advanced fares for bona fide domestics.

"For the present and because the undertaking will be more or less of an experiment, it has been decided," said Mr. Winkler, "to limit the operation of the policy to 100 women. The advance to each woman will approximate 50 to 75 percent of the fare and the government is providing for an expenditure of $7,500 this year. It is hoped that these women will be secured through a country-operation between federal and provincial governments' co-operation.

SHORT OF BREATH Could Hardly Walk Without Resting.

When you go to a physician to be examined for any heart trouble, one of the first questions he asks is: "Are you short of breath?"

Now, when the heart becomes affected there ensues a feeling of a choking sensation, a shortness of breath, palpitation, throbbing, irregular beating, smothering sensation, dizziness and a weak, sinking, all-gone feeling of exhaustion and anxiety.

On the first sign of the heart becoming weakened or the nerves unstrung Milburn's Heart and Nerve Pills are just the remedy you require. They regulate and stimulate the heart, and strengthen and restore the whole nerve system.

Mr. Stephen Crouse, East Clifford, N. B., writes: "I suffered for five years with heart trouble. I could hardly walk from the house to the barn without resting, as I used to get so short of breath. Doctors could not help me. My wife told me to get a box of Milburn's Heart and Nerve Pills and I felt better after taking them; three boxes made me quite well. I am now able to run on to work on the farm, and can truthfully say I feel like a different man."

Price 50c. at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

War Indemnity for France

Fifty-Five Percent Goes to France; Twenty-five to Britain

France is to receive 55 percent of Germany's payments, Great Britain 25 percent and the remainder is to be divided between Belgium, Italy and Serbia, Premier Millerand told the finance and foreign affairs committee of the chamber of deputies in explaining his recent agreement with Premier Lloyd George at Hythe. The proportion to be allotted France and Great Britain, he declared, had been agreed upon by the peace conference.

M. Millerand stated that the rate of interest to be demanded from Germany on the 120,000,000,000 marks indemnity she was to pay had not been determined, but he believed it would not be less than five percent, plus a long percent redeeming rate for the holders of gold bonds which Germany must issue.

The indemnity, he said, would be exclusive of the coal delivered to France and of the compensation for devastated mines and for cattle destroyed or stolen during the war.

Industries in the West

Plans of the Saskatchewan Bureau Of Industry

That the Saskatchewan government through the newly created bureau of labor, will undertake the industrial development of known resources; that it will investigate the practicability of every industry which might appear to be possible of development in the province, because of the presence of raw material or other favorable conditions; that the bureau will do all in its power to bring to the people of Saskatchewan a realization of the necessity of supporting their own home industries. The foregoing were the principal points made by Hon. C. A. Dunning, Minister of Labor and Industry in the Saskatchewan government, during the first public announcement on the government's policy since the creation of the bureau of industry.

Ancient Custom Survives

Tourists to England are very much amused by some of the strange customs which still survive. There is one which visitors are gravely told necessitates keeping a soldier on guard in the midst of a lawn in front of an old castle because several hundred years ago a certain queen's favorite rose stood there. A sentinel has been set to guard the rose, and sentinels keep on guarding the spot long after both the queen and her rose have passed away.

Experience is a dead loss if you don't sell it for more than it cost you.

Seal in all the Flavor

IMPERIAL Parowax—seals in all the natural flavors of fresh fruit into your preserves. The safe and sanitary way to preserve fruits, jams, pickles or vegetables. Saves time, labor and money.

The Parowax way is the easy way. Just pour the melted wax over your cooled preserves and it solidifies into a clean, air-tight seal—dust-proof and moisture-proof.

IMPERIAL *Parowax*

—a pure refined white wax, odorless, tasteless, colorless, absolutely sanitary—no chemicals or acids.

Placed in your wash-boiler, Imperial Parowax loosens the dirt, bleaches the clothes and removes the greasy spots that otherwise require so much rubbing. Rubbed over your iron, and mixed with your starch, it gives that finished lustre to ironing that is so much desired. Imperial Parowax, a household necessity.

For sale by good dealers everywhere.

Branches in all Cities

Wasted Energy of the Sun

Only A Very Small Fraction of the Solar Heat Caught by the Earth

All that the earth has caught of the sun's energy, for all the millions of years that it has existed, is the merest fraction of what the sun has radiated in the same time, said Sir Oliver Lodge in a recent lecture.

The earth to the sun is like a printer's full stop at a distance of ten feet from a cent piece. Some of the radiations from a globe one inch in diameter falls on the spot one one-hundredth inch in diameter ten feet away, but that little speck only catches the hundred and fifty-millionth part of the whole. What has become of the rest of the solar energy? It must still be careering through space. The ether is perfectly transparent, and only when it encounters matter will the radiation be mopped up and turned into heat.

Not our sun only, but all the millions of other suns, have likewise always been pouring out radiation into space. Is there any hope of catching and utilizing it? Probably not. In spite of all this constant flood of energy space is cold, very near absolute zero. The reservoir is so enormous that all these taps, running for ages, have made no impression on it, have not raised the level a perceptible amount.

Fires on German Liners

Another of the mysterious fires aboard former German liners taken over by the British has occurred. This time it is the giant Imperator. A blaze started in the captain's cabin and serious damage was prevented by the quick work of the fire brigade. The police are conducting an investigation. These unexplainable fires on the vessels which Germany has lost to the merchant marine of her former enemy, have broken out not only while the boats were in port, but in several cases when they were at sea.

Serbian Race Illiterate

In Saxony, Bavaria, Wurtemburg, and some other German states only rarely can a person be found who cannot read and write, while in Serbia, prior to the war, 78.9 percent of the adult population was illiterate.

American Indians are almost never found with beards.

Saskatchewan Phones

Seven Hundred Miles of Long Distance Projected

Approximately 700 miles of long distance telephone lines will be built by the Saskatchewan government this year, providing the program of the department is carried out as drafted. This will involve the use of 28,000 poles and about 1,200 miles of wire. Labor continues moderately scarce and wages high, to an extent which, coupled with heavy costs for building material, has seriously curtailed the building program of many firms.

Professional Ethics

Could there be a more vivid example of professional honor than that of the French doctor who continued on his way to the bedside of a seriously sick patient after he had been overtaken with the news that his son had met with a most distressing accident? The pathos of the incident is heightened by the fact that the father learned on his return that the boy had died in his absence.—Providence Journal.

The theatre was in an uproar.

"They're calling for the author," said the stage manager.

"Oh, but I can't make a speech," said the man responsible for the play.

"The manager grabbed the trembling writer firmly and impelled him along the passage. As he shoved him toward the curtain he said curtly:

"Well, just go out in front and tell 'em you're sorry."

A Creditable Act

Maud.—I'll give Jack credit for getting me a nice engagement ring.

Marie.— I understand that's what the jeweller did, too.

The Joy Of A Perfect Skin

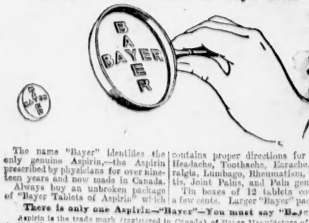
Know the joy and happiness that comes to one thru possessing a skin of purity and beauty. The safe, distinguished appearance it renders brings out your natural beauty to its fullest. In use over 70 years.

Gouraud's Oriental Cream

FERD. T. HOPKINS & SON, Montreal

ONLY TABLETS MARKED "BAYER" ARE ASPIRIN

Not Aspirin at All without the "Bayer Cross"



The name "Bayer" identifies the only genuine Aspirin,—the Aspirin prescribed by physicians for over nineteen years and now made in Canada. Always buy an unbroken package of "Bayer Tablets of Aspirin" which contains proper directions for Colds, Headache, Toothache, Earache, Neuralgia, Lumbago, Rheumatism, Neuritis, Joint Pains, and Pain generally. Tin boxes of 12 tablets cost but a few cents. Larger "Bayer" packages.

There is only one Aspirin—"Bayer"—You must say "Bayer"

Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Monoaceticacidester of Salicylicacid. While it is well known that Aspirin means more manufacture, to assist the public against imitations, the Tablets of Bayer Manufacture will be stamped with their general trade mark, the "Bayer Cross."

Paving Way For Franco-German Trade Relations

Berlin.—The German delegates who have returned to Berlin from the Paris industrial conference are fairly well satisfied with the progress thus far, says the Vossische Zeitung.

As regards chemicals, says the newspapers, a resumption of relations proved easy, pre-war connections being resumed. In the textile and metal groups, however, agreement was difficult because of the failure to bring together in unison persons suitable for an amicable understanding. For example, there was no representative present from Germany's so-called heavy industries. The newspaper says that no decision was arrived at on the necessity for co-operation between certain branches of the French and German industrial trades.

Need More Immigrants

Prosperity of Canada Assured When Country is Filled With Workers

Winnipeg.—That the prosperity of Canada will be assured when the country is filled with workers from Europe, people who will devote all their possible time to the prosperity of Canada, was the substance of a recent statement by W. L. Griffith, permanent secretary of the office of the immigration commissioner for Canada, who is a visitor in the city.

"Farmers with capital are insufficient to increase the powers of production of the Dominion. The workers themselves are necessary," he declared, "so that wages will be a great factor in the expansion of the Dominion's trade.

Back From Exile

King Alexander of Greece Will Return to Throne

Paris.—King Alexander of Greece, who is now in Paris, will return to his capitol upon the conclusion of his visit here, it was announced at the Greek legation. This announcement sets at rest the published rumors that the king did not intend to return to Greece, having decided to share the exile of his father, ex-King Constantine, and that he might be succeeded on the Greek throne by an English prince.

Four Bids for Manitoba Bonds

Winnipeg.—Four bids in American funds, each above par when exchange is figured in, were received by the Manitoba government for a six per cent government bond issue aggregating $2,769,000, it was announced at the treasury department. The highest offer was made by the Canadian General Securities Company, a Winnipeg firm, but the tender was limited to a block of $1,769,000, with a two weeks' option on the remaining $1,000,000. Prices offered ranged from $95.57 to $86.98.

Low Water on Yukon

Seattle, Wash.—Extremely low water is likely to prevent the opening of navigation on the Yukon river until about June 12, according to advices from the north. It is more than 25 years since the water was so low at this season.

Calgary Miners Present Demands

Calgary.—U. M. W. of A. miners presented their demands for a thirteen percent increase over the present schedule to the operators. The increase will mean a total increase of 27 percent over the scale which was in effect last October.

Irish Question No Concern of U. S.

Washington.—A resolution declaring "The Irish question to be of no concern to the United States," was introduced by Democratic Congressman Connolly frm Texas.

Attack on Col. Amery

Truth Declares He Is Not A Trustworthy Representative

London.—Truth, which is independent in general politics, but consistently supports free trade, says:

"Apropos of the West Indian conference at Ottawa, Col. Amery and Lord Milner are quietly pursuing the projects of imperial preference which should be watched by free traders. The West Indies are crown colonies under the thumb of Downing Street, and though delegates from their various administrations are attending the conference, it is doubtful as to how far they will present the interests and the opinions of the local trading community and the population in general. Arrangements which might be advantageous to Canada might easily be disadvantageous to the West Indies and the Mother country as well. Col. Amery is certainly not a trustworthy representative in this matter. He takes the view that anything which benefits the Dominions benefits us, which is matters of commerce and finance, is mere sensational nonsense."

Sims Replies to Wilson

U. S. Rear-Admiral Declares President's Plan Was Audacious And Certain to Fail

Washington.— While President Wilson's "bold and audacious policy" for the navy was sound, the specific operation he advocated to crush Germany was "impracticable for technical reasons," Rear-Admiral Sims told the senate naval investigating committee.

"However," he concluded, "the aggressive policy advocated was, of course, not the correct course.

The sacrifice of half the combined British and American fleets would not have been too great a price to pay if it would have suppressed the submarine and ended the war, but the attempt would have been unwise, as, in the opinion of the responsible naval experts, it would certainly have failed.

Viscount French Insulted

Irish Rebels Remove Lord Lieutenant's Name From Freemen's List

Londonderry.—The corporation has decided to remove from the roll of her city's freemen the name of Viscount French, lord lieutenant of Ireland. The Unionists challenged the legality of the proposal. The mayor of the city voted for it. He said later that if he had not done so, capital would have been made out of his refusal.

Alderman Praisley, proposing the resolution to strike out the name of Viscount French, said that under Lord French the "social and civil life has been tortuous," the alderman declared "that stands for Cromwellian cruelty and is the Pontius Pilate of Ireland."

Circus Crashes Through Bridge

Lethbridge.— One man was killed and another injured, though not seriously, in a wreck of Christie Brother's circus train which broke through an irrigation canal bridge on the Cardston sub-division of the Canadian Pacific Railway. The engine had passed over the bridge, but the heavily loaded baggage-car crashed through. The dead man and his injured comrade were both circus employees.

Bank of Saskatchewan

Ottawa. — In the senate, Senator Ross presented a petition for the incorporation of the Bank of Saskatchewan, with head office in Regina.

G.W.V. President Thinks Time Ripe For General Election

Ottawa.—R. B. Maxwell, of Winnipeg, Dominion president of the G. W. V. A., who has been here investigating the political situation has issued the following message to the 776 branches of the association throughout the Dominion:

"From knowledge gained of political and economic aims in Canada on the part of the Great War Veterans' Association to obtain equitable restriction legislation, I deem it my duty to urge upon you the necessity of an early general election. Parliament has confessed inability to redeem former pledges, and restore to returned soldiers and dependents in a substantial measure those economic advantages they would now enjoy but for war service.

"Parliament has shown reluctance to offset such failure by measures for the improvement of living conditions throughout the country, whereby returned men might more easily regain a secure foothold in the country.

"Parliament now requires that those who have seen war service shall be exempt from the major portion of the new acts.

"Parliament has denied to the electorate of Canada any opportunity since 1911 to assert their views upon domestic questions by means of the ballot. Parliament continues to issue statements, but is not supported by the vast majority of those who have the interests of the balance at heart, nor of our association."

Kolchak Exhibited To Jeering Crowds

Former Russian Commander on Show For Fee Before His Death

Vancouver.—Admiral Kolchak, former head of the all-Russian government, after his capture by revolutionists, was placed in a cage at Irkutsk and exhibited for a nominal charge, according to N. Deberg, former member of the Admiral's staff, who arrived from the Orient on the steamer Manila Maru.

Crowds surrounded the cage, according to Deberg, heaping epithets upon Kolchak, and jeering at him.

Previously to Admiral Kolchak's capture Deberg said, he had journeyed toward the scene of strife unmolested by the protection of the allied government. Deberg escaped at night in a steamer on which all lights were masked and so reached Tokio.

Do Not Need Passports

Ottawa. — U. S. Tourists visiting Canada do not require passports as a condition of entry into Canada from the United States or as a condition as to leaving Canada, was the announcement made from the department of the interior.

Canada welcomes bona fide tourists the statement says, and extends every possible courtesy to such travellers in entering and leaving the Dominion.

Mennonites May Leave Swift Current

Receiving Offers For the Land They Contemplate Vacating

Swift Current, Sask.—Jacob Friesen, head of the Mennonite ' colony south of Swift Current, left a few days ago for Mississippi to make the final arrangements in connection with removal of the Mennonites from this district to settle upon lands in the southern states. Upon the result of Mr. Friesen's negotiations rests the final decision concerning the migration of the Mennonites from Swift Current district, where they own 150,000 acres of the very best farming lands. Before leaving, Mr. Friesen stated that no papers had yet been signed guaranteeing special privileges to his people by the United States authorities. If these special privileges were not forthcoming the arrangements for moving to Mississipi would be at an end and the colony would then reconsider the proposal to move to Brazil. In the meantime, the Mennonites are receiving offers from several quarters for the land they contemplate vacating. Following an offer from an Ontario syndicate recently, efforts are now being made by representatives of French settlers in Maine and Quebec to obtain options on every possible colony farm. The price offered is $40 an acre to include implements and improvements and the season's crop. Crop prospects are so favorable at present that many of the Mennonites will refuse to join in any exodus that may take place. The provincial government has arranged for the erection of several more schools in the settlement and will rigidly enforce the school attendance act.

Villa Will Not Surrender

De Facto Government Has Already Begun Organization Against The Outlaw

El Paso, Texas.—Further efforts to persuade Francisco Villa to lay down his arms were futile, according to General Ignatio Pregue, commander of the Chihuahua Bureau of Socialist, who telegraphed the Mexican consulate here that the de facto government can settle the Villa problem only by force of arms.

The de facto government of Mexico has already begun its threatened organization against Villa. Many bands of troops have been sent into the mountains to hunt down Villa and his band of men.

Embargo on Coal Suggested in U. S.

Washington. — Suggesting embargoes by the United States on products required by Canada for her industries to meet the Canadian embargoes on Pulp wood, the house foreign affairs commission have favorably reported the senate resolution for a special commission to deal with the Dominion government on the subject. Canada, the commission declares, must have coal, and we must have pulpwood. Embargoes on pulpwood, the report says, have restricted mills in the United States, and have prevented the United States from buying this commodity.

Investigate Aviator's Death

Vancouver.—An enquiry has been obtained by the Dominion air board into the airplane crash of last Monday in which E. H. Beasley was killed, according to a message received by Major Claire McLaren, D.S.O., Col. Richard Bell Irving and Major Scott Williams have been appointed to assist Major McLaren in the investigation.

Kolchak Was Shot By Revolutionist

Denied Trial, He Smoked Cigarette While Facing the Firing Squad

Victoria.—Details of the killing of Admiral Kolchak, head of the allied government troops in Siberia, were told her by Captain Webb, provost marshall with the British forces in Siberia, who has arrived here on the steamer Manilla Maru, from Vladivostok. Through treachery, he said, Kolchak was captured by revolutionists and incarcerated with former Premier Reppeliayeff at Irkutsk. When placed in front of a firing squad, Peppeliayeff was shot down when he attempted to escape.

Kolchak, denied a trial and the privilege of seeing his wife, coolly smoked a cigarette and awaited the volley. The order to fire was disobeyed by the firing squad, whereupon a commissary strode forward, pushed Kolchak's head back, and shot him to death with a revolver.

Oppose Extension Of Divorce Laws

Anglican Bishop in Toronto States Case Against Proposed Legislation

Toronto.—Strong opposition to the relaxation of laws governing divorce was voiced by Bishop Sweeney in his charge at the opening of the 68th annual meeting of the Anglican synod of the diocese of Toronto. His lordship referred to proposed divorce legislation and declared that the church of England was opposed to divorce save for the cause allowed by her divine head.

The bishop quoted from legislation adopted by the church in 1905: "No clergyman within the juridiction of the Church of England in Canada shall solemnize a marriage between persons either of whom shall have been divorced from one who is living at the time." He concluded by saying: "We must oppose, by every legitimate means, any legislation which seeks to enlarge the causes for which divorce is to be granted."

Murderers Escape

Three Men Serving Life Sentence at Boston Scale Walls Of Prison

Boston.—Herman Barney, who was sentenced to prison for life for the murder of Patrolman Charles Denniger, in this city in February, 1919, Harry Mansthier, serving a life sentence for the murder of Patrolman Joseph Riser, in this city a year ago, and Charles Ward, a negro, serving a 20-year sentence, escaped from the state prison in the Charleston district by scaling the walls. They were clad in prison garb.

Increase Rolling Stock

Winnipeg.—This year the Canadian National Railway rolling stock will be increased by the building of 5,750 freight cars, 80 locomotives and 70 passenger coaches. The additions to the rolling stock contracted for in 1919 are now almost completed, it was learned. In 1919 new freight cars to the number of 1,549 were built, 50 locomotives and 240 passenger cars.

Gold Dredges in Full Blast

Dawson, Y. T.—The Yukon's fleet of gold dredges are now operating in full blast. The hydro-electric power plant of the Yukon Gold company has started and its dredges immidiately began digging. Other dredges also commenced operations. The territory's yield this season will run into millions. The clean up of the winter dumps is under way.

Bumper Crop for Bulgaria

Sofia.— Bulgaria's crops were among the greatest in the country's history and those of this year promise even greater abundance. The country now has so much wheat and maize on hand that she is exporting part of it to Belgium and Poland. The present stocks of these cereals amount to nearly six billion pounds.

Italians on Way West

Port Arthur, Ont.—The first party of several hundred Italians who are coming to settle on farming lands in western Canada, reached Port Arthur on a special train, and continued on through to Winnipeg. The party was twenty days crossing from Italy. There were about 100 on the train and more are coming by other steamers.

Prince William Arrives in U. S.

New York. — Prince William of Sweden, second son of King Gustave, arrived here from central America on the United Fruit company's steamship Santa Maria. The prince has been engaged in scientific exploration in central America since early in the year.

To Include Women

Ottawa.—An act to incorporate the Army and Navy Veterans in Canada was amended by a committee of the commons to provide for the inclusion of women's organizations.

Pres. Wilson Vetoes Peace Resolution

Rejection of the Treaty Means Selfish Isolation For U. S.

Washington. — The Republican peace resolution was vetoed by President Wilson.

"Such a method of making peace with Germany," the president said, "would place an ineffaceable stain on the gallantry and honor of the United States."

Without announcing his intention regarding the treaty of Versailles, the president declared that the treaty embodied the important things omitted by the resolution and said that by rejecting the treaty the United States had declared in effect that it wished "to draw apart and pursue objects and interests of our own."

The president added that the peace resolution omitted mention of many important objects for the vindication of which the United States entered the war.

Stores of Sugar to be Sent Abroad

Halifax. —An interesting commentary upon the announcement that sugar is due for another advance is to be found in the fact that great quantities of sugar are being piled up here, presumably for exportation abroad. It is stated that several hundreds of thousands of bags of sugar are at present awaiting shipment at one pier and that the quantity is daily increasing. At another pier upwards of a quarter million bags of flour are waiting shipment abroad.

Good Prospects for Trade With Japan

Canada Must Wake Up Or Opportunity Will Be Gone

Vancouver.— Unless Canada takes steps in the immediate future to establish trade relations with Japan on a larger scale than exists today, the Dominion will be forestalled and the opportunity gone, is the opinion of Arthur E. Bryan, Canadian trade commissioner to Japan, who is here to attend the Canadian manufacturers convention next month. There are excellent prospects of a very large volume of trade with Japan, Mr. Bryan stated. The value of American export with that country during last year was 700,000,000 yen, and the U. S. is doing all in its power to increase trade with the Japanese.

"Unless Canada wakes up," Mr. Bryan said, "very soon, she needn't wake up at all, for she will be forestalled."

Mr. Bryan will address the delegates to the Canadian manufacturers' convention here. He will then leave for Ottawa to encourage the furtherance of trade with Japan.

Aid Asked for Soldiers

Room For Returned Men in the B. C. Fisheries

Ottawa. — Re-establishment of the returned soldier in the fishing industry of British Columbia was urged upon the special committee on pensions and re-establishment by Col. C. W. Peck, V.C., Skeena. Col. Peck said there was room for returned men in the B. C. fisheries and a fishing industry controlled by white men should be built up. This would also solve the unemployment problem to a great extent and would mean a greater production of food.

Loans to encourage the fisheries industry were not a new idea. Money was provided by some countries for placing engines in fishing boats and otherwise energize the industry. In Britain demobilized fishermen are assisted in acquiring steam drifters, steam trawlers and other fishing craft.

Government May Not Take Over Board

Edmonton, Dunvegan and B. C. Line Will Probably Be Reorganized

Edmonton.—National ownership of the Edmonton-Dunvegan and British Columbia railway is a decidedly remote possibility, according to premier Stewart, who has returned to the city from a two weeks' official trip to Ottawa. Instead of the federal government purchasing the system, as was semi-officially announced by Sir George Foster some months ago, a move that is well under way in the east, it appears, to reorganize the E. D. and B.C. company, and thus bring in sufficient capital to put the road in good shape for traffic and take adequate care of the business in hand.

Wants Drill Sent to Lake Dauphin

Winnipeg.—In a report on the presence of oil in the Lake Dauphin district, Commissioner R. C. Wallace, of northern Manitoba, recommended to the government that a drilling outfit be sent to that district capable of sinking a shaft of 1,000 feet in order to settle the question once and for all and making speculation impossible.

Several Wounded

Rome. — Several persons were wounded in the disturbance Monday at Taranto, arising from the celebration of Italy's entry into the war.

New Law Places Restrictions On Race Track Betting

Compelled Farmer To Give Up Land

Sinn Fein Forbids Purchase Over the Heads of Local Young Men

Dublin.—Control of Irish land by the Sinn Fein is very effective, as is instanced by an occurrence at Carrick-on-Shannon, which was reported here. A farmer named Morrison was summoned before the Sinn Fein land committee to show why he had attempted to buy land over the heads of young men of the district who did not own property. He had just purchased a grazing farm for $3,500, and told the committee he had bought it for his two brothers in the United States. The committee warned him to surrender it immediately, which he agreed to do with reluctance.

Unknown persons have seized and sunk Lord Kingston's yacht, the Meetah at Carrick-on-Shannon, apparently because Lord Kingston entered a claim for $2,000 for the destruction of a police barracks on his property. The claim was subsequently withdrawn, but no public announcement of this step had been made.

Increased Savings Deposits

High Level Reached During Month Of April

Ottawa.— The bank statement for April, just issued by the finance department, showed a continued increase in saving bank deposits.

They now stand at the new high level, $1,209,000,000 as compared with $1,070,000,000 a year ago and $933,000,000 at the end of April two years ago.

Call loans in Canada were rather lower than shown in the statement for March. Current loans in Canada are about twenty-five millions higher.

Denial by Krupps

Declare They Are Not Making Any War Material

Berlin.—Statements from Paris that the Krupps are manufacturing war materials are countered by the Krupps in a communication to the Frankfurter Zeitung, which says the French republic is aware of the fact that they are not manufacturing war materials.

Peace Delegations Reach Agreement

London.—The Letlish and Bolshevik peace delegations, which have been sitting at Moscow, have reached an agreement by which Russia recognizes the complete independence of Letvia, according to a statement from an official Letvian source in London.

An agreement has been reached on the frontier questions, with the exception of some minor technical details such as the occupation of the Dritsa district, where there will be a plebiscite. Economic questions have not yet been discussed.

Vegetables Drop in Chicago

Chicago.—Prices of all vegetables dropped from five to thirty-five per cent on the Chicago market in the last ten days, commission merchants said recently. Market experts said the decline in prices was due to increased receipts.

To Duplicate Cable

Vancouver. — The Pacific cable board is considering the duplication of its cable from Canada to the Antipodes, John Millwood, manager of the board, has announced.

Big Elevator Deal

Winnipeg. — One of the biggest deals in grain storage space ever consummated here is announced. The Leitch-McLean Elevator company has purchased 17 elevators from the Imperial Elevator company and one from Hallet and Carey.

Ottawa.—Profits of racing associations are limited according to the amount bet on each race by a provision of the amendments to the criminal code in the commons, by Hon. C. J. Doherty.

These additions provide that betting shall be by the pari-mutuel system only, and that profits of race-track owners shall be limited to 7 per cent of the amount bet on each race where that amount is under $20,000.

On all amounts over $20,000 and under $30,000 the percentage is restricted to six percent.

In each case the percentage of the racing club or association is to be governed by the total amount collected by the mutuel system. There is also a change in regard to the breaks which the association is allowed to retain. They will be allowed to retain a percentage, a multiple of five percent, over and above the earnings. There will be an official at each track to see that no bets are accepted after the horses come to the post in each race, when the machines must be locked, and in that way it is aimed to check any attempt at fraud. Racing, as a result of this, will be cleaner.

All the present conditions regarding the operation of the betting on racetracks, with regard to the number of days of racing, etc., are continued in force, and the provision that parimutuels alone shall be used and that profits shall be restricted as above are added to the present charges.

No definite date is set for the bill coming into effect.

Welcome to Prince

Railway and Tramway Strikes Which Had Been Threatened Did Not Develop

Melbourne. — In Melbourne the Prince of Wales has been well acclaimed. A fleet met the Renown, while airplanes circled over the harbor. Three thousand pigeons were released in the midst of the cheering crowds as the prince disembarked and drove through the thronged streets.

The railway and tramway strikes which had been threatened by the unions did not develop.

Wheat Crop Dried Out

Washington.— The wheat crop of New South Wales has been so disastrously affected by drought that the yield probably will not be sufficient to meet domestic consumption in Australia, said a report from the U. S. consulate at Sydney. The crop was estimated at 4,296,000 bushels, the smallest yield in 20 years.

Canada's War Indemnity

Ottawa.—Canada's reparation claim against Germany for losses sustained by the country and by individual citizens during the war, has been forwarded to England for presentation at a conference of representatives of all parts of the British Empire soon to be held in London and subsequently at an inter-allied conference at Spa. The latter conference by Dominion is for a total of $1,871,000,000.

C. P. R. Lines Spread with Hopper Poison

Winnipeg. — D. C. Coleman, vice-president of the Canadian Lines of the C. P. R., has wired instructions from the coast to have all the rights of way of the C.P.R. in the grass-hopper infested areas spread with poison bait. The ingredients of the bait will be supplied to the company at cost by the provincial governments of Manitoba and Saskatchewan.

Germany Hands Over Rolling Stock

Berlin.—The minister of transportation has announced that the delivery of 5,000 locomotives to the entente in accordance with the peace treaty, has been completed.

U.S. Has to Face Crucial Decision in Regard to Armenia

London. — "President Wilson has presented a dramatic challenge to congress and his countrymen upon subject of their international duties," says the Pall Mall Gazette, dealing with the Armenian question.

"He has asked for authority to accept a mandate for Armenia in the name of the United States, and the answer will be fraught with moral consequences of the highest importance.

"Great Britain has all the responsibilities that she can carry; none of the other European powers are prepared to take Armenia under their jurisdiction; the league of nations, favored by America in words, but rejected in act, has no resources or capacity for playing protector. If the United States refuses the charge it means the abandonment of Armenia to enemies which surround her on every side, and probably the eventual extermination of a race already decimated by hideous cruelty.

"It is a crucial decision which congress is invited to take. If its answer is in the negative it must register in sinister the value to be placed upon United States moral enthusiasm

The Mission Circle of the Baptist church will hold their regular meeting at the home of Mrs Dissau on Thursday, June 3rd, at 3 p.m. All ladies are invited to this meeting.

BREVICK-PERKINS

A quiet and pretty wedding was solemnized at the Methodist parsonage, Lacombe, on Monday at 12 noon, when Florence Alberta, the second daughter of Mr and Mrs D. I. Perkins, was united in marriage to Mr Paul Brevick, of Brooksley, Alberta.—Rev. Mr Hollingsworth officiating.

The bride was becomingly gowned in white silk habutai and silk crepe de chene, carrying a large boquet of white chrysanthemums. The bride was attended by her sister, Miss Myrtle, who was dressed in pink silk, while the groom was attended by the bride's brother, Mr Lyle Perkins. The happy couple drove out to their home at Brooksley, where Mr and Mrs John Brevick gave a reception in the evening, when a few immediate relatives met.

CAN HAVE WHEAT BOARD IF DESIRED

Calgary, June 1.—Whether the wheat board will be continued or not depends on the desire of the farmers, according to H. W. Wood, president of the United Farmers of Alberta, and a member of the board, who returned Friday from the east. If the farmers desire the board, it will be continued, he said.

HOW BIG A THING IS CHIROPRACTIC?

Chiropractic comes upon the field and makes vast pretentions.

For five thousand years the best minds of the medical profession have searched the heavens and the earth trying in vain to find the cause of disease, which Chiropractic teaches is to be found within the body. Against the wonderful organization known as the American Medical Association, with its endowments of millions, its secure position in the educational institutions, and the popular prejudice of the general public, Chiropractic has nothing to hurl but the constant, ly increasing "whereas I was sick and am now well" of those upon whom all other methods had failed.

To succeed where all others fail is the supreme test, and unless Chiropractic can do this it has no excuse for its existence.

Honest and open minded members of other health professions acknowledge its merits, while progressive and forward looking ones study it and are lead in ever increasing numbers to adopt it and abandon their former methods.

Unfortunately it has also attracted to itself a horde of pretenders who find the word Chiropractic the most profitable addition they can make to their business cards.

PONOKA'S PUBLIC PARK

Ponoka, May 24, 1920.

Dear Sir:

May I trespass on your good nature to the extent of allowing me a word or two in regard to the Public Parks affair. With reference to your remarks in your local column I fail to see how the name would or would not be relevant to the matter in question. Either the arguments put forward as of them given answered or they are not. Personally I think the points raised were very well taken, and, what I think of the beautiful open space you could have had there in that particularly favourably situated spot with swings, see saws and round about in one corner such as children delight in, with Thursday afternoons and certain evenings reserved for the older folks to skip around and compare the possibility with the over-sized chicken coop which, as we come in the west road, all but blots out the town, I can hardly help thinking a mistake has been made.

I would further say that I believe your correspondent took a sensible course in adopting a signature as thereby the discussion could be kept strictly impersonal. You must have noticed by this time that in such a small place as your Ponoka, when say Jim Crosstalks wants a thing done this way Tim Tiddledinks won't hear of it and wants it done exactly the opposite so it might not be a bad idea to make a feature of inviting impersonal discussion for the improvement of your town for surely there is room for it.

With this end in view permit me to sign myself,

Yours truly,
FARMER FLINTOP.

Climax

Mr and Mrs W. A. Martin were Sundayed at the W. H. Stone home, near Ponoka.

L. Reese is erecting a set of new buildings on his half section in western Climax, and will move his family here from Edmonton shortly.

Bert Owens is ill in bed with rheumatism.

Mrs L. Headley and Mrs J. J. Few and children visited relatives in Climax Sunday.

Otto Magsdans has been doing some improving on his place lately.

Gwilym Lloyd spent Sunday at the J. O. Owens home.

The following is taken from a Colorado paper:—"Orville, aged 5 months and 6 days, infant son of Mr and Mrs W. T. Jones, who reside 1½ miles east of Hugo, on the former Danley place, died of pneumonia last Wednesday morning, May 12, at 6.40 o'clock. The parents came here a short time ago from Canada."

Plant is Insect Terror

Has the Properties of A Sticky Fly Paper and No Insect Can Escape

One of the most curious plants is found in the vivarium of the Pennsylvania University. The name of this wonderul plant is the Finguicula Canadata, and the name is as long as the plant is small. The plant is small and modest and has a pretty flower and pretty leaves. Despite its innocent looks and small size it is an object of terror to all insects. For it has the qualities of fly paper and should any guileless insect stop upon its sticky leaves it could never get away because the leaves have a sticky substance upon them which retains the insect. As every insect passes this plant, its inviting look tempts insects to spend a few minutes of recreation upon its pretty leaves. But alas! it never leaves the surface of the leaves until it is absorbed by this fly-catcher, when it goes to enrich the constitution of the plant. As the leaves are always covered with insects, the plant nourishes into one of the most thrifty plants. "This insect-catcher" of Dame Nature would be a boon and a blessing to many housewives who are troubled with mosquitos and flies. For if a few of these plants were placed on a table in a room infested with the above-named insects, the room would soon be free from these little pests which are so abundant during the warm weather.—Irving W. Finkle.

Strong Women

By. Dr. Valentine Mott.

Women and men too—are just as strong and healthy as their *blood*. Vigor and health come with good blood. Without good red blood a woman has a weak heart and poor nerves.

In the spring is the best time to take stock of one's condition. If the blood is thin and watery, face pale or pimply, if one is tired and listless, generally weak, a Spring Tonic should be taken. An old-fashioned herbal remedy that was used by nearly everybody 50 years ago is still safe and sane because it contains no alcohol or narcotic. It is made of roots and herbs and called Dr. Pierce's Golden Medical Discovery. If druggists do not keep it in tablet form, send 50 cents for a vial to Dr. Pierce's Invalids' Hotel in Buffalo, N. Y.

Poland's Improved Position

Victories in Russia Enable Them To Consider Peace Negotiations

Victories won by the Polish armies in Russia have placed Poland in such a position that within a short time it will be able to resume peace negotiations with the Bolsheviki, the Polish Legation was informed by its government.

"The Polish government," the cable message stated, "has given proof of its peaceful intentions in notes and official communications. The manner in which Poland has treated the Ukrainian question proves the complete absence of any imperialistic aspirations or intentions of conquest. The victories of our army have placed us in a position that within a short time we will be able to reconsider peace, leaving to the Soviet government the privilege of choosing the place for the negotiations from among the places proposed by Poland and which will answer the purpose for which intended."

Keep Minard's Liniment in the house.

Don't Quit the Home Garden

World Shortage of Food Incentive to Increased Production

During the war a drive was made to persuade people in cities to help win it by consuming less food and by raising what they could in yards and gardens. Their response in both directions did help win the war and with that tremendous strain over with there has been a general let-down, which, coupled with continued shortage of farm labor and unsatisfactory crop conditions, constitutes another serious threat to the maintenance of the world on anything like a normal food basis.

The winter wheat crop seems certain to fall 250,000,000 bushels below the 7332,000,000 bushels of last year. The spring crop, it is estimated, will add not more than 200,000,000 bushels, giving a total of perhaps 650,000,000. In other words, unless the scraping of bins brings out an unexpected surplus, our wheat production will hardly support our own needs.

This is not a pleasing prospect, and it should prompt the city man who took up home gardening as a war measure and who now regards it as something of a fad to continue it for the present purpose of getting stuff to eat at a reasonable figure.—Baltimore News.

Bought Brother's Watch From Hun

A remarkable incident connected with the war has occurred at Pontesbury, a Shropshire village. A German, hawking watches, sold one to a man named Sankey, who was surprised on opening it to find his brother's name inscribed therein. He bought the watch after considerable bargaining.

The brother who lived at Pontesbury, served in the Scots Guards and was killed in France in 1914.

May Recover Laurentic Gold

A London cable to the Montreal Star says: The government salvage steamer Racer has sailed for Southampton bound for the Irish north coast in an attempt to raise the £3,000,000 worth of specie which is lying in the hulk of the White Star Liner Laurentic, a score of fathoms below the ocean surface. The Laurentic was sunk either by submarine or mine, while on a voyage to America in the early part of 1917.

Serbia Land of Centenarians

Serbia is the land of centenarians! In that country, figuring on the present number of centenarians in proportion to the whole population, one person in every 2,260 lives to the age of 100 years. In Denmark and Switzerland, on the other hand, the average is less than one to a million of population.—Indianapolis News.

Divorce and domestic infelicity are virtually unknown among the Esquimaux.

Good Prospects in Irrigation Block

Swedish Colony on Bow Slope Are Prospering

A few miles south of Brooks, in the eastern section of the Canadian Pacific Railway's Irrigation project in southern Alberta, a very productive district has sprung up during the last two or three years. This district lies to the north of the Bow River and what is known as the Bow Slope, and has been found especially suited to irrigation.

In one of the best parts of the Bow Slope is the Swedish colony of Upland, which was established in 1918, and which now has a population of about 300 people and an area close to 8,500 acres under crop. In 1918 the acreage under crop was 600, in 1919 2,200 acres were cropped and this year an authoritative source states that 8,362 acres of land has been seeded.

The Bow Slope produced heavy crops last year and the settlers there look for heavy production in 1920, as conditions are in every way a great deal more favorable. About 4,000 acres of the total area in crop is being seeded to flax, it having proved a splendid crop, especially on new broken land. Last year as high as 23 bushels to the acre was raised on Bow Slope farms. As the land is getting in better shape, alfalfa is being planted, and already about 200 acres are under that seed, made up of small plots on various farms.

Throughout the whole irrigation block, moisture conditions are excellent, and a great deal of breaking is being done. Many farmers have been working night and day, both to get in all the wheat possible and to prepare new land for crop. On the farms of the Duke of Sutherland work has been done in two shifts and wheat seeding is now completed with two thousand acres in crop.

Notwithstanding there is sufficient moisture everywhere for rapid germination, preparations for irrigating are being made and every possible minute is being taken advantage of to get the ditches in shape and ready for the water which is expected to be turned on within the next week, or, at the very latest, by the first of June.

She Had Noticed It

Mrs. Bigbrow.—I admire your husband so much. He has such a logical mind.

Mrs. Tuntwist.— Yes, he's terrible logical. He's got a different lodge for every night in the week.

NEURALGIA AND SCIATICA

Caused by Starved Nerves Due To Weak, Watery Blood

People generally think of neuralgia as a pain in the head or face, but neuralgia may affect any nerve of the body. Different names are given to it when it affects certain nerves. Thus neuralgia of the sciatic nerve is called Sciatica, but the character of the pain and the nature of the disease is the same. The cause is the same, and the remedy, to be effective, must be the same. The pain of neuralgia, whether it takes the form of Sciatica or whether it affects the face and head, is caused by starved nerves. The blood, which normally carries nourishment to the nerves, for some reason no longer does so and the excruciating pain is the cry of the starved nerves for food. The reason why the blood fails to properly nourish the nerves is usually because the blood itself is weak and thin.

When you build up the thin blood with Dr. Williams Pink Pills, you are attacking neuralgia, sciatica and hundred diseases at the root. As proof of the value of these pills in cases of this kind we give the case of Mrs. Thomas McGuire, North Malden, Ont., who says: "I have been a severe sufferer from sciatica, which attacked the sciatic nerve in the left leg. At times the pain was most excruciating and as a result of the trouble there was a distinct shrivelling of the leg. I could only hobble about by using a cane, and I attempted to walk to the fields I would have to sit down every little while so ease the agony I felt. I used different medical treatment, but as there was no improvement shown, I was getting very despondent, as the trouble was affecting my general health. Finally a friend advised me to try Dr. Williams Pink Pills and I decided to do so. I took the pills faithfully for several months, finding a gradual and increasing improvement in my health, until finally every vestige of the trouble had gone, and I was again enjoying the blessing of good health and freedom from pain. What Dr. Williams Pink Pills did for me seems almost a miracle and I hope that my experience may benefit some other sufferer."

If you are suffering from any ailment due to weak blood avail yourself at once of the splendid home treatment which Dr. Williams Pink Pills so easily afford, and you will be among those who rejoice in regained health. These pills are sold by all dealers in medicine, or may be had by mail at 50 cents a box or six boxes for $2.50 by writing The Dr. Williams Medicine Co., Brockville, Ont.

"Got a hacking cough and a headache?"

"Well, I've a little wood you could back and it might cure your head."

"Much obliged, mum; but my 'eadache ain't of the splittin' variety."

The Canadian government is building 60 ships with a deadweight tonnage of 325,000.

The administration of an oath in judicial proceedings was introduced by the Saxons 600 A.D.

Cotton has been grown in India since prehistoric times.

Land or Settlement

Millions of Acres of Arable Land In The West Lying Idle

To foster co-operation and unity between east and west in Canada, to people 20,000,000 acres of vacant lands and thereby secure a vastly increased national production, to enlarge the domestic market and reduce the Dominion's war debt— these are among the notable purposes of the Western Canada Colonization Association. The promotion of desirable immigration is the solution proposed, and for this purpose a fund of $1,500,000 will be required.

It is estimated that there are at least twenty million acres of arable land lying within twenty miles of existing railways, exclusive of those held by the government, the Hudson Bay Company and the railways, that should be brought under cultivation. The Western Canada Colonization Association, having behind it the whole business confidence of the three western provinces, and many business and financial leaders in eastern Canada, is endeavoring to conduct a work which the government cannot do, and its motives are regarded as so worthy that the utmost co-operation is being extended by all those who have thus far been approached.

The object is not to buy or sell these lands, but to advise prospective settlers of their true value. Such lands are now privately held, and the heavy unearned increment taxes imposed by the western provinces on vacant land disposes owners to sell at a reasonable price. Further than that, the general interests and well-being of the new settler will become the care of the organization until he is on his feet.

The Care of Your Car

It Always Pays to Operate A Car With Care

"To get the maximum enjoyment and comfort from your car you must be thoughtful of it," says an authority.

"Do not race the motor unnecessarily. Be warned by every abnormal noise. If it is a squeak, locate it, and lubricate the part. If caused by loose parts, locate them and tighten the bolts.

"Don't tinker. Half the ability to make an adjustment or repair is the ability to discover its necessity. If all adjustments are carefully made when needed and every bearing and working part is well lubricated the smooth operation will be continuous with a minimum of attention.

"By neglecting details you may save time at the start, but you will make up for it in the long run. Do not maintain too high a speed in driving. The time saved will not offset the liability of accidents, nor the extra wear to which the car is subjected. In the end the time saved this way is a loss in dollars and cents.

"You will find that a normal rate of travel will conserve the life of your car and give you the utmost return in economical service. It is not the number of miles covered in a given time that counts most, but the number of miles of travel that can be obtained at the least cost for fuel, oil, tires and adjustments."

Minard's Liniment used by Physicians

A Perfect Antidote

Two rich girls have been arrested in New York stores during the past week on the charge of shop-lifting. In each case their lawyers claim they were the victims of aphasia. It seems they walked into the stores, looked around and suddenly the world became blank. They did not come back to their normal senses until detectives tapped them on the shoulder and said they were under arrest. It seems a good detective is an absolutely perfect antidote for aphasia.—New York Correspondent.

Reading the Great Book

A good deal is said in these days of the need of quieting the unrest and nervous excitement that prevails among all sorts of people. Possibly a course of bible study would prove a better cure than anything yet tried. Also it might have its effect in encouraging the better Americanism we all profess so much desire to establish. Certainly the bible reading plan ought to meet with widespread acceptance.—Chicago Evening Post.

Minard's Liniment Co., Limited.

Gents. — I have used your MINARD'S LINIMENT in my family and stables for years and consider it the best medicine obtainable.

Yours truly,
ALFRED ROCHON
Proprietor Roxton Pond Hotel and Livery Stables.

Preserving Spider Webs

Naturalists employ an ingenious method in order to preserve the web of the spider. The webs are first sprayed with a thin solution of artists' shellac and then, if of the ordinary geometric form, they are pressed carefully against a glass plate, the supporting threads of the web being severed. After the shellac solution has dried, the plates carrying the webs are stored in a cabinet for later use in scientific work.

Huge Irrigation Projects

More Land Is Brought Under Irrigation in Alberta

Another large area of land in southern Alberta has been brought under irrigation during the last few days when water was turned into the main ditch of the Canada Land and Irrigation company, east of the Little Bow Reservoir, for irrigating what is known as the Vaukhall district, where 5,000 acres of land purchased by settlers from the United States, will be put into crop this year. The water will be ready for use on the farms.

Water was turned into the main ditch from the Bow river intake, 40 miles east of Calgary, a year ago last fall, and since then the huge reservoir in the Snake Valley, known as Lake McGregor, which is nine miles long and holds enough water to run the entire project for a year, has been filled. Some weeks ago, water was turned from this reservoir into the main ditch to the east, and the reservoir at Little Bow, which holds enough for a month's operations, was filled. Now the water has been turned out into the ditches from this reservoir.

The turning of the water into the ditches marks the successful culmination of an engineering project which has been in course of development for a number of years. It is ten years or more since the project was first undertaken, and since then it has been through various reorganizations and changes, until it culminated in the amalgamation of three distinct companies into the Canada Land and Irrigation company. The main ditch of the project is 175 miles long, and from this it is ultimately planned to irrigate 220,000 acres of land.

Presence of Mind

Scot.—Two eggs, please.

Waiter.—Which way will you have them done?

Scot.—Any difference in the price? Waiter.—No.

Scot.—Well, I'll ha' them wi' a wee bit ham.

America gets more than one-third of its glass from Pennsylvania.

Healthy, Happy Boys and Girls

IS your child healthy? Is he or she up to standard weight, of good color, with plenty of rich, red blood to nourish the growing tissues?

For children who are thin, pale, anaemic, under weight, nervous, restless, sleepless, Dr. Chases' Nerve Food is of the greatest benefit imaginable.

Being mild and gentle in action, and yet wonderfully patent as a restorative, it soon makes the blood rich and builds up the feeble nerves.

50 cents a box, 6 for $2.75, all dealers, or Edmanson, Bates & Co., Ltd., Toronto.

A Link With the Past

Old-timer at Edmonton Recalls Stirring Life of Early Days

To be seized and dragged from your horse by a party of Indians on the warpath; be tied to the stump of a tree and have brush piled about your feet, amid the jeers of the painted savages, and, just as the brush was fired, to be rescued by your companions who had heard your screams.—Did it ever happen to you, even in your dreams? Yet this is only one of the experiences that are milestones in the history of one of Edmonton's oldest citizens, Tlesphore Alexander Blair. Born 89 years ago on the banks of the St. Lawrence, "Daddy Blair," as he is known, is spending the evening of his eventful life in the Alberta capital, living again in his tales of the past his adventures in the days when the west was "West," when as frontier mail-carrier, scout, hunter and trapper, on foot and on pony-pack, he travelled the prairie and the northland from B. C. to Manitoba, and from the Yukon to the Dakotas. Probably no living man has made a longer mileage in the west, or all over the world, than this French-Canadian old-timer, now janitor of a "mission" in Edmonton.

Catarrh Cannot be Cured

Unskilled Workers Are Well Paid

Sugar Plantation Workers in Honolulu Get Big Bonus

With sugar selling at 19.50 cents a pound, the monthly bonus rate which is being paid to sugar plantation laborers in Hawaii amounts to 345 per cent of the wage rate, or a daily wage rate of $3.42 for the lowest paid unskilled laborer. In other words the laborer who receives a basic wage of $20 a month is now being paid $69 a month, the $21 man is being paid $79.34, and the $24 man is being paid $84. If sugar goes to 20 cents, the lowest paid unskilled laborer will receive $74 in wages and bonus. Under the Hawaiian plan, the laborer is paid his wages and 75 per cent of his bonus each month, the remaining 25 per cent of the bonus being retained for him until the end of the bonus year.

Messages From Mars

As soon as their expenses are guaranteed, Prof. David Todd, Amherst college astronomer, and Leo Stevens, foremost American aeronaut, will ascend into the upper air for another attempt to hear the messages certain scientists maintain are being wireless-ed from Mars. It is the dream of Todd's entire life to establish a communication with the red planet, proving his contention that a race, wise in the ways of science and nature, dwells there.

A Problem

Applicant.—What I want is a bed-sitting-room for a gentleman about 24 feet long by 12 feet wide.

Agent's Clerk.— You'll have great difficulty, sir. I could scarcely find one, and I'm only five-foot four.

Music by Long Distance Wireless

Remarkable Experiment Successfully Carried Out By Wireless Telephone

A large audience at the Chateau Laurier assembly hall heard perfectly a gramophone playing in Montreal and also Miss Lutton singing in that city over one hundred miles away by means of wireless telephone. It was arranged by Dr. A. S. Eve, in connection with an address on some great war inventions, before the Royal Society of Canada. The experiment took place at nine o'clock and by means of a Magna Vok the voice of the distant singer was quite distinctly heard in all parts of the hall.

Hundred Murder Cases

Carnival of Crime in the City of Chicago

One hundred murder cases — the biggest homicide calendar ever given a criminal court in the United States —have just been placed in the hands of six Chicago judges.

Two judges who, in the past, have heard nothing but murder cases in the Chicago Criminal Court, have had to appeal for help, and four additional judges have been added to clear up the violent maze.

Henry Barrett Chamberlain, head of the Chicago Crime Commission, explained the carnival of crime as being the most forcible example on record of the need of Americanization of the alien elements.

The great majority of the one hundred murders were committed by aliens, or by new Americans who have not absorbed the American spirit, he said. "Americanization" is a high-sounding term to many persons. To the man in the street it means teaching the foreigner to read and write and spell and to know the name of the President—a job for school teachers and reformers."

"Your lunch will be fresh and tasty at dinner hour to-morrow. It is wrapped in Para-Sani."

PARA-SANI WRAPPER

Heavy, waxed paper in Household Rolls, with handsome oak Roller-Box. Para-Sani is cheaper and more convenient than waxed paper in loose sheets and the paper is of better quality.

PONOKA BRANCH,
J. G. LAFRANCE, ... Manager.

Strictly Cash AND Better Service

ON the First of April we decided to conduct our Garage Business on a STRICTLY CASH BASIS. In order to make this plan a success, and be fair to everybody dealing with us, we had to make it Spot Cash with no exceptions.

Each year we endeavor to be of more Service to our patrons. The Cash Basis will assist in beating the high costs which prevail, enable us to carry better stocks, and pass the saving on to you by giving Better Service without increased cost.

We ask you to co-operate with us and feel sure it will benefit all.

M. G. Neff

Your Eyes Need Care

The eye is a very delicate organ which needs care and attention. If good sight is to be retained. Many cases of partial and total blindness might have been prevented by timely aid. Do not take chances if you have any trouble with your eyes. Consult me. I have the latest equipment and the most modern methods.
